A broad-spectrum biological fungicide for soil-borne and foliar diseases.

Companion’s GB03 strain of Bacillus subtilis has multiple modes of action to prevent plant diseases. It produces a broad-spectrum Iturin antibiotic and triggers Induced Systemic Resistance (ISR) in plants, where the plant’s natural immune system is activated. Companion forms a protective shield along the plant root and crowds out pathogens.

Used by grower’s across the country, who will attest to Companion benefits. Including fast-colonizing beneficial rhizobacteria stimulate root growth, promotes plant vigor, and increases crop yield.
The color of the fairway was outstanding and never changed from day one to 21 on the Anuew™ side, compared to the discoloration that occurred in the first week on the Poa from the competitors.
